

# **Ferramentas de Avaliação de Competências Digitais: Case: Plataforma PIX**

Lucia Dellagnelo, Ed.D.

Maio 2024

# Perguntas orientadoras para análise de ferramentas de avaliação de competências digitais

<https://pix.org>

Pix é uma ferramenta online desenvolvida para autoavaliação e certificação de competências digitais.

Desenvolvida por uma organização sem fins lucrativos por meio de parcerias com o Ministério de Educação da França, especialistas e representantes de escolas públicas

## About us

Founded in 2016, Pix is a non-profit, French-based public organisation aiming to improve digital literacy across the globe. Our structure is bringing together various French and international public stakeholders involved in education and professional training.

Behind Pix is a team of 100 experts from various fields, all driven by a common goal: help everyone assess and improve their digital skills to use them in any setting!

## A global educational common good

①

### Universal

3 general interest missions embodied by a single platform open to all

②

### Free and open-source

A platform developed as a free and open-source software through agile practices.

③

### Co-constructed

The result of 4 years of co-construction with teachers, students, and professionals. Any user can suggest improvements.

Avaliar + Desenvolver+ Certificar

<https://pix.org/en-gb>

Foi lançada pelo Ministério da Educação, Juventude e Desporto francês em 2020 com o objetivo de promover competências digitais na população.

Indivíduos podem medir as suas competências digitais, validá-las através de certificação e desenvolvê-las por meio de cursos e tutoriais

O Pix foi projetado para ser acessível a todos os indivíduos, independentemente do seu nível de escolaridade ou situação profissional, e o registro é gratuito.

### Test your skills

Create your personal account and improve your skills with fun, interactive challenges

### Learn at your own pace

Develop the digital skills essential to your everyday life

### Showcase your skills

With the Pix Certification, your skills are recognised in France and throughout Europe (DigComp)

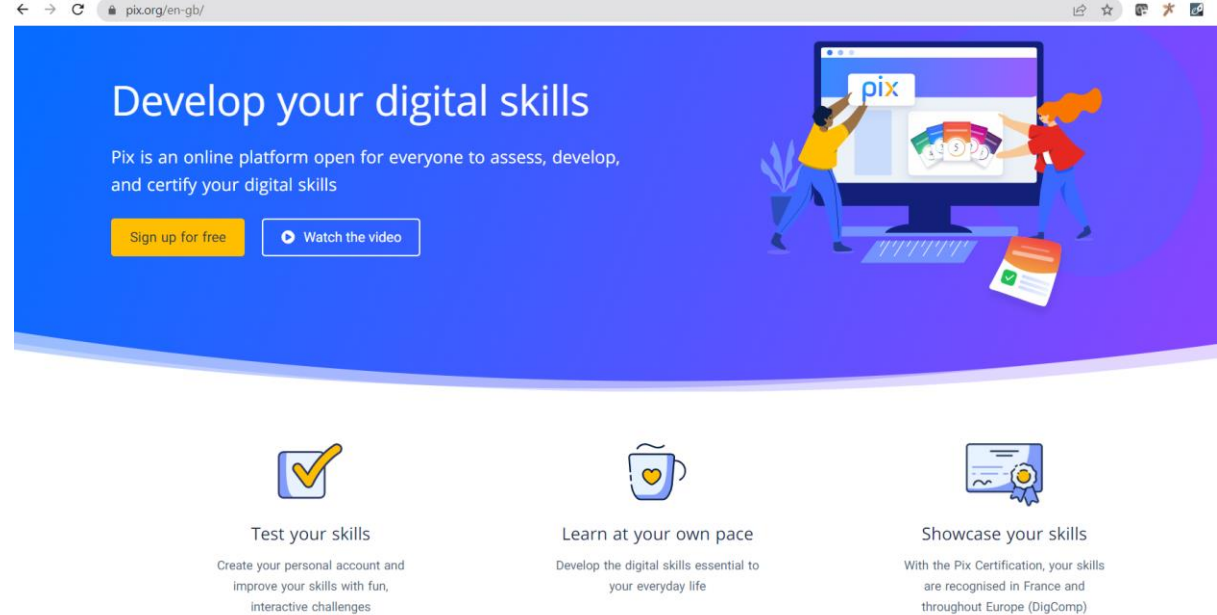

**6 million**  
active users

**75,000+**  
users every day

**4 million**  
certifications taken

<https://pix.org/en-gb/>

- ✓ Pix avalia competências digitais através de uma abordagem gamificada e personalizada com foco em conhecimento e competência.
- ✓ Os indivíduos enfrentam desafios da vida real utilizando competências digitais.
- ✓ As perguntas são adaptativas e as respostas incorretas vinculam-se a recursos de aprendizagem relevantes.
- ✓ Os professores podem realizar campanhas de avaliação para seus alunos, permitindo-lhes monitorar a participação individual e o perfil de habilidades de cada aluno

# Marco conceitual sólido e transparente: DigComp 2.0

## Information and data

Search engines, information intelligence, fake news, organising files, using a spreadsheet...

## Communication and collaboration

Emails, calendars, social media, collaborative work and document sharing platforms, digital public services...

## Content creation

Editing text, image, sound and video files, copyright, programming...

## Protection and security

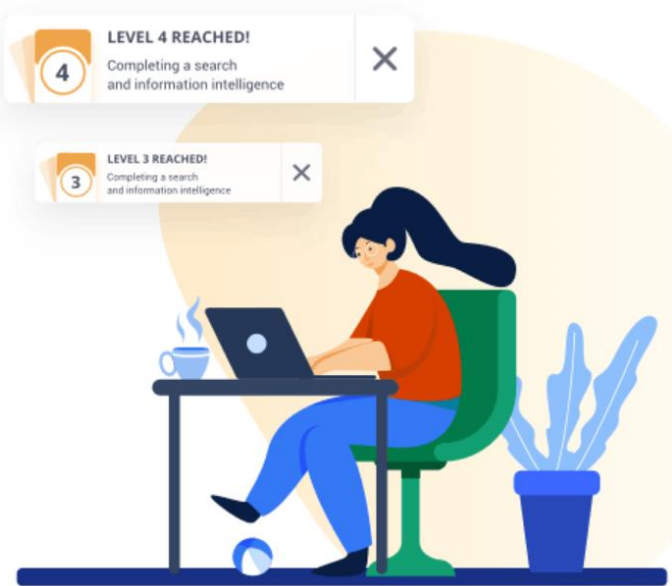

Personal data, accessibility, workstation ergonomics, cybersecurity, environmental impact of digital technology, cyberbullying...

## Digital environment

Solving technical problems, operating systems, IT and equipment, the history of IT...

# 5 áreas/dimensões e 16 competências

# Marco Conceitual: Níveis de competência e progressão por dimensão

## What's behind a Pix level?

### Beginner

- Level 1: Even if you need a little help from time to time, you've got the basics down.
- Level 2: You've got the basics down, you don't need much to be independent.

### Independent

- Level 3: Even on your own, you do well in familiar situations.
- Level 4: You are independent in all common situations. The digital world opens up for you!

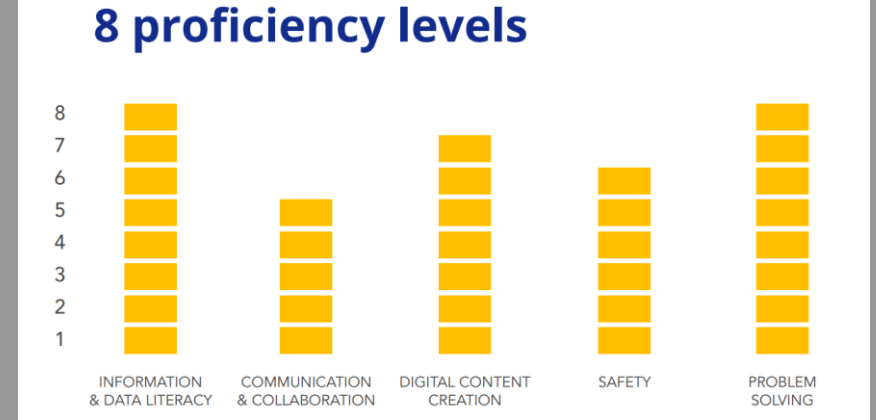

### Advanced

- Level 5: You are comfortable with digital technology, even off the track.
- Level 6: Very proficient. You are often asked for help, aren't you?

### Expert

- Level 7: A new, unpredictable or difficult situation? Nothing can stop you. You use digital technology in innovative ways.
- Level 8: You do not only use digital technology, you develop new solutions: you are an expert! What an expert :)

Level 8 is coming soon! Only level 7 is available for now.

## The proficiency levels in Pix

1-2	Beginner
3-4	Independent
5-6	Advanced
7-8	Expert (not available yet)

## At any level

### From beginner to expert

Pix is accessible at any level, from the most basic to the most elaborate questions.

### An adaptive algorithm

The level of difficulty of the questions is adjusted to your level after each question to help you improve faster. When you succeed, you move up to higher level. If you have difficulties, you'll get questions that are within your reach.

### An evolutive framework

Technologies and uses evolve: our questions and framework too!

# Propósito/Objetivo

Avaliação  
competências digitais

Test your skills

Create your personal account and improve your skills with fun, interactive challenges

Desenvolvimento

Learn at your own pace

Develop the digital skills essential to your everyday life

Certificação

Showcase your skills

With the Pix Certification, your skills are recognised in France and throughout Europe (DigComp)

# Metodologia

Auto-avaliação com questões de **conhecimento** e **performance** formuladas a partir de desafios reais e bem contextualizados

Play an active part in your learning experience!

## Providing proof

Carry out a task in your own digital environment, outside of the platform, and then report the answer on Pix!

## Recreating real-life situations

Immersed in a situation inspired by real life, you are looking for the solution that applies to this context.

## Interactive challenges

In an actual simulator under the exercise, you will carry out a task in an interactive zone, without having to leave the platform.

## Digital knowledge

Answer questions with your own digital knowledge or look for it on the internet.

PIX avalia o que você **sabe**, o que você **consegue fazer**, e sua **habilidade em identificar as implicações** da ação digital por meio de situações reais, resolução de problemas, e desafios e pesquisa.

pix

### Questions to test:

- what you know,
- what you can do,
- your ability to identify what is at stake.

#### Real situations

Tools  
simulators

File handling

Web browsing

#### Problem solving

#### Challenges and research

# Learners can test and develop their skills in two ways

You have 16 competences to test.  
Get your thinking hat on and off we go!

## In autonomy

By clicking on a competence of their choice in their Pix account, to practice independently

or

## Through a test prescribed by an organisation

By entering the code (or the url link) provided by their organisation to complete a test and transmit their results

In both cases, they progress through the levels and earn pix.

Angelina, enter your code

This code contains 9 letters and/or numbers. It is given by your school/organisation and can be used to start a customised test or to submit your profile

Start

If you are not Angelina Tessier, please log out

What is a customised test code and how do I use it?

## Pix Orga: a dashboard for trainers

- **Define** digital skills profiles
- **Choose** the profiles to be tested
- **Customise** messages and the landing page

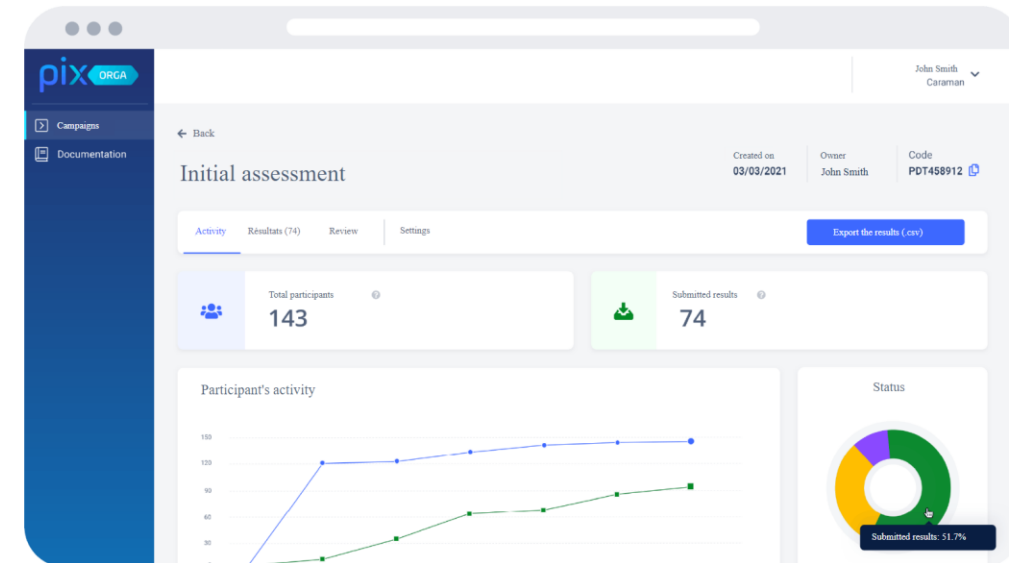

- **Invite** users to join the tests
- **Monitor** progress and manage follow-up actions

- **Access** learners' detailed digital skills profile to provide them with valuable support
- **Analyse** consolidated results and data

### Pix Orga, the turnkey online dashboard for managing your tests

While your learners test their digital skills on Pix, track their progress with Pix Orga, your dedicated dashboard. Identify your learners' needs, strengths and weaknesses, and evaluate their progress!

## Develop your learners' digital skills

Build your learners' essential digital skills throughout their education

Pix is implemented with pupils from the start of secondary school – the 6th grade will be integrated into the scheme at the beginning of 2023 – through to higher education, in general and vocational courses. It provides for certification at key points in the schooling process.

Universities, schools and training organisations that innovate with Pix

**CNTE**  
المركز الوطني للتكنولوجيا في التربية  
Centre national des technologies en éducation

**Hes·SO**  
Haute Ecole Spécialisée  
de Suisse occidentale

**SORBONNE**  
UNIVERSITÉ

**Aix-Marseille**  
université  
socialement engagée

Assess, develop, and certify the digital skills of your learners

### Secondary education

From looking for information on the web and preparing a presentation to managing their privacy on social media, digital skills are more necessary than ever for students' learning: help them become citizens who are aware of digital issues.

### Higher education

Attending a lecture online, handing in assignments online, looking for an internship or a first job... Support your students in developing and promoting their digital skills, essential for their studies and their future career.

### Vocational training

Using office and collaborative tools, understanding the concept of digital identity, protecting data and privacy in the working world... Help your learners to acquire the digital skills they need in the workplace.

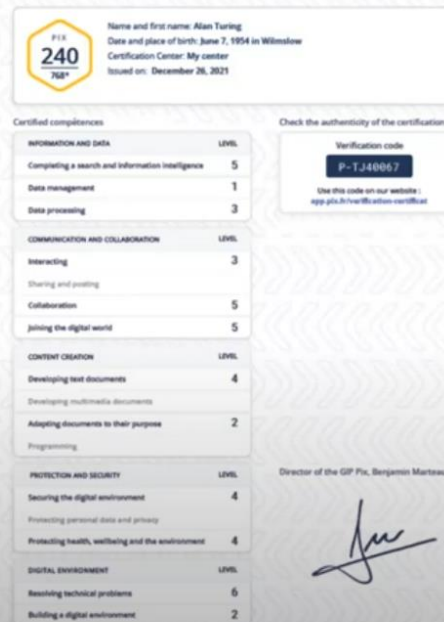

pix

Whether the user trains independently or via a personalized test that you have created, the results will make their skills profile evolve.

**pix** Certificate

This document attest that Pix certification has been obtained

Director of the GIP Fie, Benjamin Marteau

# Principais Características da Plataforma PIX

Marco conceitual  
consistente

Plataforma atraente e fácil  
de usar

Tarefas de teste atualizadas  
com progressão adaptativa

Análise de  
dados/comparação de  
desempenho pessoal e de  
grupo

Plataforma integrada para  
testar, aprender e adquirir  
credenciais para  
habilidades digitais

Operado por uma  
organização com agilidade  
e excelência técnica, mas  
com parcerias com  
governos e organizações  
internacionais

# Diferenciais da Plataforma PIX para Educação

- Gratuito e acessível a todos os professores, estudantes e escolas;
- Avalia competências digitais numa vasta gama de áreas, tais como criação de conteúdos online, segurança informática, análise de dados, etc.
- Permite que o usuário acompanhe seu progresso e indica áreas-alvo para desenvolvimento;
- Permite que professores acompanhem o desenvolvimento das competências digitais dos estudantes e identifiquem áreas para formação.

# Obrigada!
